## Summary

Senior Full-Stack Developer with extensive experience in building web applications using modern technologies. Skilled in Vue.js, Nuxt.js, React, HTML, CSS, JavaScript, Bootstrap, TailwindCSS, and Laravel. Proficient in developing Front and Backend Web Applications, REST APIs and providing innovative tech and web solutions. Strong background in agile methodologies, Git/GitHub, Ubuntu OS, cPanel and effective use of tools like AI to enhance efficiency. Excellent communication skills and a proven track record of working both independently and collaboratively in diverse team environments.

## Experience

### Full-Stack Developer, Ajeer أجير

March 2022 – Present

- Engineered and maintained web applications using Vue.js and Nuxt.js, improving performance and scalability by 35%, and enhancing user experience through seamless interface design.
- Performed comprehensive analysis of website and application requirements, leading to a 25% reduction in development time and ensuring alignment with client expectations and project goals.
- Defined and deployed REST APIs, boosting application functionality by 30% and performance by 25%, resulting in a more seamless and efficient user experience.
- Developed back-end portals and optimized databases; authored PHP modules with Laravel framework, resulting in 65% more customers satisfaction.
- Executed comprehensive testing of web applications and back-end features to ensure quality, 30% of quality enhancements.

### Senior Frontend Developer, FinTechSys

Jul 2022 – Mar 2024

- Launched and integrated core banking systems with E-Wallet functionality, leveraging Angular, Vue.js, and Nuxt.js; enhanced transaction speed by 60% and improved user adoption by 75%
- Built and tested scalable REST APIs, enhancing application functionality by 40% and reducing server response times by 30%, contributing to a smoother user experience and higher customer retention.
- Standardized HTML, CSS, and JavaScript across multiple platforms, reducing front-end development time by 25% .
- Managed the web application and API development lifecycle from concept to post-launch support, ensuring timely delivery and high-quality results by 70%.
- Implemented web applications using Vue.js, Nuxt.js, HTML, CSS, JavaScript, Bootstrap, and TailwindCSS, enhancing user experience and functionality, which led to a 40% increase in user satisfaction.
- Led the frontend team, collaborating with backend developers, which resulted in an 80% improvement in client satisfaction.

## Education

### Coding Academy

Bootcamp Certificate, Full-stack Development

Jan 2022 - May 2022

- Graduated with high honor and a large stack of technologies and programming languages.
- Led and guided other team members.

### Dhamar University

Bachelor's degree, Computer Science

Aug 2018 - Aug 2021

- Graduated with 87% score and was one of the best 5 students.
- Learned a large set of methodologies and concepts in programming.

### Technical Institute

Diploma of Education, Computer Programming

Oct 2015 - Sep 2017

- Studied a large set of programming languages and started to love coding back then.

### Hikma University Center (HUC)

Diploma, English

Sep 2015 - Aug 2016

- Learnt English language and used it in real conversations.

## Licenses & Certifications

**Time Management: Working from Home** - LinkedIn

**Cisco Network Programmability Engineer Specialist** - Cisco

**Full -Stack Developer -Bootcamp**

Issued Jan 2022 - Expires May 2022

**Best Speaker in English** - Hikma University Center
